

a. Metadata

Title: Django for Beginners

Author: William Vincent

ISBN: No, it seems a website "book"

Link: <https://djangoforbeginners.com/>

b. Coverage of Django

Q: Does the book cover Django 4?

A: This book Completely updated for Django 4.0.

c. Introductory Tutorial

Q: Does this book have one? If not, what do you propose that I use for an introductory tutorial?

A: This book has its own introductory tutorial!

d. Django Reference

Q: While the Pinkham book is not a reference book, it does cover many of the advanced Django features. Does the candidate textbook cover as many features as the Pinkham text? If not, can you suggest another book that I could pair with this candidate text as a Django reference?

A: Due to the access right, I guess the candidate textbook not cover as many features as the Pinkham text. But there is another book that is written by the same author called "Django for Professionals". I guess this one works.
